things but I would also bet that the root cause of a lot of farm accidents is fatigue and stress.

We have all been there. All I am asking is that when you know you have been pushed to the limit take some time and get refreshed. It's a simple solution, but it could save you a lot of money or even your life.

If you do push your limits, I hope your story is amusing and maybe even a bit embarrassing like mine. If it is, share it with me so we can laugh about it together. I am just asking you to take the extra step and be careful. The number of farmers and ranchers is getting fewer all the time and we can't afford to lose anyone else. I hope spring and summer go smoothly, and I pray that everyone stays safe. Hopefully, your worst mistake finds you on the wrong side of a gate.

The project proved to be even more extensive than first expected. There were to be signs installed at each site that includes the website URL which will host pages with detailed information about the site and its significance.

Two years into planning, COVID-19 called a timeout for two additional years. Much work was completed from home however, and the website continued to develop.

With a grant from the Dane G. Hansen Foundation, LCCHS is ready to begin working on the next 25 sites.

They are looking for volunteers who could help set up the next group of signs.
