

On September 9th The Stanton County FBLA took 15 seniors to Ulysses for career explorations, The Students visited Grant County Bank, Pioneer Electric, Pioneer Communications, and Farm Bureau.

Nitrates

Continued from Page 1

gry, pregnant or lactating are more susceptible than healthy livestock.

The best way to know whether forage is safe is to have a representative sample analyzed for nitrate before feeding or grazing it. Forage containing more than 6,000 parts per million (ppm) nitrate should be considered potentially toxic, while levels of 9,000 ppm or greater are considered dangerous to cattle and often cause death.

Management can help reduce the risk. When harvesting potentially high-nitrate forage, raising the cutter bar 6 to 12 inches can leave behind the lower stalk

where nitrate concentrations are highest. Ensiling is generally preferred over making hay because fermentation can convert about half of the nitrate to a nontoxic form, while nitrate concentrations in hay remain virtually unchanged.

When stressful growing conditions occur, producers should use caution rather than assume forage is safe. Testing suspect forage before feeding, managing harvest height and carefully managing high-nitrate feeds can significantly reduce the risk of nitrate toxicity in livestock.

When in doubt, contact the Stanton County Extension Office at 620-492-2240 for testing.

It is with great regret that the Republican Party is taking applications to fill the vacancy for **Stanton County Clerk**. All interested candidates, either verbally or written may be sent to Carson Lucas, 620-424-7574 or carsonluc@gmail.com or Linda Steimel, 620-353-4749 or ldsteimel@gmail.com Applications will be accepted until **September 18th, 2026, at 5:00 p.m.** A Republican Convention will be held September 22, 2026, at 6:00 p.m. at the Stanton County Courthouse basement to appoint a new County Clerk to fulfill the remainder of the current term. All interested people are encouraged to attend. Republican Committee

Football

but scored on all three touches, finishing with 120 rushing yards and three touchdowns. Asked by Adam Sierra about the feeling following the victory, Hernandez said he felt "real good and proud."

Camden Floyd earned Defensive Player of the Game honors after recording six solo tackles and two pass deflections. Floyd told Sierra one thing he learned about himself during the opener was that he could "concentrate under pressure and step in when my number is called."

Hernandez and Floyd also

pointed to eighth-grader Justin Durrone as an unsung contributor whose performance might not appear prominently in the statistics. They credited Durrone with making key blocks and good defensive reads throughout the game.

The victory gives the Trojans a strong opening to the season, but the message from the coaching staff remains centered on improvement. Assistant Coach Jr. Hernandez joins Hines on the coaching staff as the Trojans look to build on their opening-week performance.

Information and interviews for this story were collected and submitted by Adam Sierra.
