KDA Announces Crop & Livestock Research Grant Opportunity

MANHATTAN, Kansas — The Kansas Department of Agriculture is accepting applications for the FY27 Crop & Livestock Research Grant Program. Funds for the program are appropriated to the agency by the Kansas Legislature from the State Water Plan Fund.

The state's Crop & Livestock Research Grant Program has developed over the years to support research efforts aimed at promoting water conservation and agricultural productivity, with a special emphasis on activities that benefit the long-term sustainability of agriculture over the High Plains aquifer in coordination with the State Water Plan. Areas of particular interest include improving the performance and marketability of drought-tolerant crops; increasing nutrient uptake and reducing nutrient runoff; maximizing efficiency of water use; and improving drought resilience for agriculture in areas with limited water resources.

This is a competitive, reimbursement-

based grant program. Applications will be evaluated by a technical review committee. The recommendations of the committee will be submitted to the Kansas Secretary of Agriculture, who will make the final award determination.

Applications are due to KDA no later than 5:00 p.m. on October 23, 2026. For more information, please download and carefully read the Request for Applications document from the KDA website: agriculture.ks.gov/grants.

The funding appropriation for the FY27 Crop & Livestock Research Program is \$450,000. Applicants may request up to \$100,000 per project, and projects can be up to three years in duration.

The vision of the Kansas Department of Agriculture is to provide an ideal environment for long-term, sustainable agricultural prosperity and statewide economic growth. The agency will achieve this by advocating for ag sectors at all levels and providing industry outreach.
